

## **Background**

Career and technology studies is an educational program that provides for increased opportunities for schools to offer courses to meet the needs of students. High school students should be able to use and develop academic skills in a practical setting through career and technology studies courses appropriate to the local culture and economic opportunities.

## **Procedures**

1. Principals wishing to offer career and technology studies courses shall follow the guidelines and requirements outlined in the *Guide to Education*.
2. Career and technology studies courses will be offered with due consideration of the abilities and interests of the students, expertise of staff and the resources of the school.
3. Planning for the offering of career and technology studies courses should take into consideration student competencies and experiences from previous courses.
