

Background

Knowledge and understanding of human sexuality is essential in the education of students. The school programs can assist parents in dealing with these issues.

Procedures

1. All schools shall incorporate the human sexuality theme of the health program at the appropriate grade levels.
2. The principal shall ensure that parents are informed as to the nature and content of the program prior to any instruction being given.
3. The principal shall advise parents to their right to exempt their children from human sexuality instruction.
4. Staff members shall ensure that resources will be selected with careful regard for the sensitivity of the topics.
5. The staff will provide alternative learning experiences for students exempted from human sexuality education.
